The Long-Awaited Solution to Science's Four-Body Problem

Published 21 hours ago on May 22, 2021
By **Lisa Baker**

Professor Gupta offers a precise solution to the four or more-body problem that has I scientists since Newton and Einstein: Project VIPIN.

In a new series of twelve books being published in 2021, under Project VIPIN, *Vastly Integrated Processes Inside Nature*, Professor **Vipin Gupta** clarifies how any number

sequentially interact with one another and the effects of the interactions on the movement of each body in the sequence. He has just launched the fourth book, *Is Divine Energy: The Limitless Immanent Value*. In an exclusive interview, Professor Gupta offers a glimpse of the secrets revealed in this book especially and in the project generally.

Why is the Value Immanent?

One of the toughest problems in physics is a four or more-body problem. Ever since the discovery of gravity, scientists have believed that no general, analytical solution exists to predict with mathematical precision the gravity-shaped movements of four or more bodies.

Suppose Somebody is going in a spacecraft seeking to discover Anybody of interest in the universe. Somebody is a special star of Everybody's attention and attraction. Anybody is a general interest that Everybody wishes to attract using Somebody as the medium. Everybody bio-electrically attracts their attraction consciousness to Somebody, so that it may attract Anybody to come out of hiding and become Somebody who can help Everybody discover Anybody like it.

If we look at Everybody carefully, it comprises a Group of Bodies. A Body decides to follow the lead of Everybody, reproducing the behavior of others by making their collectivity its Twin Body. The Body trades the reproductive energy of the Twin Body and reproduces that as its own gravitational energy. When a Body is attracted to reproduce what the Twin Body is currently manifesting a gravity-shaped movement. Twin Body interacts with the Body's consciousness to motivate the Body to reproduce its reproductive energy, which is the gravitational energy that is shaping Anybody's behavior by curving its perpetuating linearity.

Each Body is not a part of Everybody. It has the freedom to not reproduce the behavior of the collective Twin Body. Instead, it may decide to be Nobody who is observing Everybody from a safe tangent, waiting for the right moment to celebrate the joyous moment of discovering the truth alongside Everybody. Nobody seemingly is a fragment of Everybody that becomes the missing body to join Everybody. Nobody's fragmentation is an illusion because whether or not it joins Everybody, it is still a part of Everybody and immanent within it.

What is the Secret to Being Limitless?

Another option is for the Body to be the Matter that forms Everybody. A Body may be the seed where Everybody is conceived, incubated, incarnates, grows, and develops into a system with the power to conceive another set of Everybody as its part.

Thus, a Body may also be the Anti-matter, that is part of the system and has the potential to be the Matter that forms Everybody.

Finally, a Body may be a Twin Matter that imparts its gravitational energy to the Matter that presently constitutes the Universe, so that the Universe may start behaving like the Matter. Let it be the Universe that is conceiving multiple Universes of Everybody limitlessly.

How does one form Divine as a Thing?

The Matter, Anti-Matter, and Twin Matter as a three-body system constitute a Thing. Thing is the tenth body in the family of ten bodies, comprising Everybody (first body), Twin Body (second body), Twin Body (third body), Somebody (fourth body), Anybody (fifth body), Matter (sixth body), Matter (seventh body), Anti-matter (eighth body), Twin Matter (ninth body), and Thing (tenth body).

A Thing may also either reproduce the behavior of Anti-Thing (eleventh body) or share the behavior as the Twin Thing (twelfth body). Therefore, it has a divine property.

A Person is the thirteenth body. A Person has a freedom to conceive the Thing as the Object it wishes to ultimately discover by discovering Anybody. In that case, the Person behaves like the Twin Thing and the Ideal Object as the Anti Thing. The Person's divine property is shared with the Thing.

Each person may decide to be a thirteen-body system. Each person may decide to let their thirteen-body system, within or without a twin person, be the anti-person shaping its behavior. Thus, the essence of Mother Nature is a four-body system, comprising the forms of superpositioned quantum bodies, disembodied substrate matter, embodied objectified things, and moving, subjectively conscious, and objectively energized perceptions of the other three bodies as apparently autonomous systems but not objects. That four-body system is known as Odderon. It manifests the correlation among the Creature, the Creation, and the Creator, mediated by oneself behaving like the Almighty Creator.

How can Divine be more than Energy?

At the macrocosmic level, Everybody is the lunar system, enjoying sentient energy (also known as astral energy) like a Creature. Body is the solar system, enjoying gravitational energy known as reproductive energy) like a Creation. Twin Body is the Stellar System, enjoying

gravitomagnetic energy (also known as divine energy) like a Creator attracting all the created. Somebody is our Consciousness System, servicing the gravitoelectric energy wish for the shooting star to create the thing as a three-body system and reproduce the system by making the whole time the divine element experiencing our divinity (i.e., collision impact).

What motivated the Project Vipin?

There is a word in Tibetan Buddhism: Jinpa. “Jinpa is the ‘gift of consciousness’ to so know to be one with nothing but the consciousness of what I have given, enjoying the perfection of my giving through a complete surrender for the conscious well-being of universe.”

How to get hold of the first four books in Project Vipin?

The first four books – [What is Divine Energy](#), [What is Present Reality](#), [Is Present Reality Divine Energy](#) – are now available in full and Nutshell editions on Amazon and elsewhere in paperback, hardcover, digital, and audible forms.

Professor Vipin Gupta is a professor of management and a co-director of the Center for Management at the Jack H. Brown College of Business and Public Administration, California State University, San Bernardino. Dr. Gupta has a Ph.D. in managerial science and applied economics from the Wharton School of the University of Pennsylvania.
